INDEPENDENT AUDITOR'S REPORT

Board of Commissioners
Kamiah Highway District
Kamiah, Idaho

Report on the Audit of the Financial Statements

Qualified Opinions

We have audited the accompanying financial statements of the governmental activities and the major fund of the Kamiah Highway District, as of and for the year ended September 30, 2024, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Qualified Opinions on the General Fund and Governmental Activities

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion section of our report, the financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities and the major fund of Kamiah Highway District, as of September 30, 2024, and the changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Qualified Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Kamiah Highway District, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified and unmodified audit opinions.

Matter Giving Rise to the Qualified Opinions on the General Fund and Governmental Activities

We have agreed with management to not observe nor test inventory changes from the prior period. Accounting principles generally accepted in the United States of America require that the District keep track of when additional inventory is purchased and when it is used. Since no adjustment was made, the amount by which this departure would affect the assets, fund balance, and expenses of the governmental activities has not been determined.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the schedule of pension funding and budgetary comparison information on pages 24 through 25 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the Management's Discussion and Analysis (MD&A) that accounting principles generally accepted in the United States of America requires to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued a report dated January 30, 2025, on our consideration of the Kamiah Highway District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Kamiah Highway District's internal control over financial reporting and compliance.

KAMIAH HIGHWAY DISTRICT

RECONCILIATION OF THE STATEMENT OF NET POSITION
TO THE BALANCE SHEET - GOVERNMENTAL FUND
September 30, 2024

Total fund balance - Governmental Fund		$ 1,302,062
Amounts reported for governmental activities in the statement of net position are different because:		
Capital assets used in governmental activities are not financial resources and, therefore, are not reported as assets in the governmental fund:		
Cost of capital assets	$ 4,122,789	
Accumulated depreciation	(2,689,210)	
		1,433,579
Deferred outflows and deferred inflows for pension liabilities are not due and payable in the current period and, therefore, are not reported in the fund:		
Deferred outflows		18,793
Deferred inflows		(6,363)
Delinquent property taxes receivable to be collected this year; but are not available soon enough to pay for the current period's expenditures and, therefore, are deferred in the fund.		2,398
Long-term liabilities are not due and payable in the current period and, therefore, are not reported in the fund:		
Net pension liability		(78,248)
Compensated absences payable		(11,321)
Total net position - Governmental Activities		$ 2,660,900

See accompanying notes

KAMIAH HIGHWAY DISTRICT

STATEMENT OF REVENUES, EXPENDITURES,
AND CHANGES IN FUND BALANCES - GOVERNMENTAL FUND
Year Ended September 30, 2024

REVENUES		
Property taxes	$	25,423
Highway user's revenue		680,896
Earnings on investments		37,300
Other		7,919
Total revenues		751,538
EXPENDITURES		
Payroll and payroll burden		140,097
Weed control and supplies		17,790
Road materials and supplies		110,364
Insurance		12,353
Utilities		4,334
Repairs and maintenance		145,566
Professional fees		7,000
Capital outlay		244,962
Other expenses		9,636
Total expenditures		692,102
EXCESS (DEFICIENCY) OF REVENUES OVER EXPENDITURES		59,436
FUND BALANCE AT BEGINNING OF YEAR		1,242,626
FUND BALANCE AT END OF YEAR	$	1,302,062

See accompanying notes

KAMIAH HIGHWAY DISTRICT

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES - GOVERNMENTAL FUND TO THE STATEMENT OF ACTIVITIES
Year Ended September 30, 2024

Net change in fund balance - Governmental Activities	$	59,436
Amounts reported for governmental activities in the statement of activities are different because:		
Capital outlays to purchase or build capital assets are reported in the governmental fund as expenditures. However, for governmental activities, those costs are shown in the statement of net position and allocated over their estimated useful lives as annual depreciation:		
Current year capital outlay		244,962
Current year depreciation		(136,302)
Some property taxes will not be collected for several months after the fiscal year-ends and they are not considered available revenues in the governmental fund. Instead they are counted as deferred tax revenues until collected. They are, however, recorded as revenues in the statement of activities:		
Current year taxes receivable		2,398
Prior year taxes receivable		(3,372)
Amounts purchased or used in the current fiscal year for inventory are expensed in the current fiscal year in the governmental activities and recorded as inventory in the statement of net position		(27,490)
Net pension liability and the related deferred outflows and deferred inflows are not considered available for the governmental fund in the current year:		
Current year net pension liability, deferred outflows and deferred inflows		(11,227)
Amounts borrowed on long-term debt are reported in the governmental fund as other financing sources. Amounts repaid on long-term debt are reported in the governmental fund as expenditures. However, for governmental activities, the borrowing and repayment of funds is reflected as outstanding long-term debt:		
Current year change of accrued compensated absences		5,704
Change in net position - Governmental Activities	$	134,109

See accompanying notes

1. SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity. The Kamiah Highway District was organized under Section 40-1301 of the *Idaho Code*. The District operates under a Board of Commissioners consisting of three individuals who are each elected from one of the three subdistricts within the District. The purpose of the District is to construct, maintain, repair, and improve all highways within the District. The District's reporting entity includes the District government and all related organizations for which the District exercises oversight responsibility as defined by the Governmental Accounting Standards Board (GASB).

The District has developed criteria to determine whether outside agencies with activities which benefit the citizens of the District should be included within its financial reporting entity. The criteria includes, but is not limited to, whether the District (1) selects the governing authority, or management (2) has the ability to significantly influence operations, or (3) has accountability for fiscal matters (e.g., final budget approval of assets, etc.). The District has determined that no other outside agency meets the above criteria and, therefore, no other agency has been included as a component unit in the District's financial statements. In addition, the District is not aware of any entity that would exercise such oversight, which would result in the District being considered a component unit of the entity.

Measurement Focus and Basis of Accounting. The financial statements of the Kamiah Highway District have been prepared in accordance with United States generally accepted accounting principles as applied to governmental units. The Governmental Accounting Standards Board is the accepted standard–setting body for establishing governmental accounting and financial reporting principles. The District uses the following two bases of accounting in these financial statements:

Economic Resources Measurement Focus and Accrual Basis of Accounting

Under this measurement focus, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Non-exchange transactions, in which the District gives (or receives) value without directly receiving (or giving) equal value in exchange, include property taxes, highway user's revenue, and federal forest funds. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenue from highway user's revenue and federal forest funds is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Current Financial Resources Measurement Focus and Modified Accrual Basis of Accounting

Under this measurement focus, revenues are recognized when susceptible to accrual; i.e., both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. The District considers property taxes as available if they are collected within 30 days after year-end. A 60-day availability period is used for revenue recognition for all other governmental fund revenues. Property taxes, highway user's revenue, and interest are considered to be susceptible to accrual.

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Current Financial Resources Measurement Focus and Modified Accrual Basis of Accounting (Continued)

The District reports deferred revenue in its fund financial statements. Deferred revenues arise when potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period. Deferred revenues also arise when resources are received by the District before it has a legal claim to them, as when grant monies are received prior to the incurrence of qualifying expenditures. In subsequent periods, when both revenue recognition criteria are met, or when the District has a legal claim to the resources, the liability for deferred revenue is removed from the balance sheet and revenue is recognized.

Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, claims and judgments, and compensated absences, which are recognized as expenditures to the extent they have matured. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Restricted Resources. Program expenses are allocated to restricted program revenue first and then to the next highest level of restricted net position/fund balances when both restricted and unrestricted resources are available.

Governmental Accounting Standards Board Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions* (GASB No. 54) defines the different types of fund balances that a governmental entity must use for financial reporting purposes. GASB No. 54 requires the fund balance amounts to be properly reported within one of the fund balance categories listed below:

Nonspendable Includes amounts that cannot be spent because they are either (1) not in spendable form or (2) legally or contractually required to be maintained intact.

Restricted Includes amounts that can be spent only for the specific purpose stipulated by external resource providers, constitutional provisions, or enabling legislation.

Committed Includes amounts that can only be used for the specific purposes determined by a formal action of the government's highest level of decision-making authority.

Assigned Includes amounts that are intended to be used by the government for specific purposes but do not meet the criteria to be classified as restricted or committed.

Unassigned Residual classification of fund balance that includes all spendable amounts that have not been restricted, committed, or assigned.

District-Wide Financial Statements. The statement of net position and the statement of activities display information about the overall District using the economic resources measurement focus and the accrual basis of accounting. Eliminations have been made to minimize the double-counting of internal activities.

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

District-Wide Financial Statements (Continued). These statements reflect only governmental activities of the District since there are no "business-type activities" within the highway district. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties.

The statement of activities presents a comparison between direct expenses and program revenues for the District's sole function of maintaining road and bridges within the District boundaries. A function is an assembly of similar activities and may include portions of a fund or summarize more than one fund to capture the expenses and program revenues associated with a distinct functional activity. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) fees and charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements. The Fund financial statements provide information about the District's general fund. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities. Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting.

Use of Estimates. The District uses estimates and assumptions in preparing financial statements in accordance with United States generally accepted accounting principles. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that the District uses.

Cash and Investments. The District's cash accounts consist of checking and money market accounts in FDIC insured accounts.

The Public Depository Law authorizes the District to invest surplus or idle funds in certain investments, including obligations of the U.S. Treasury, the State of Idaho, certain Idaho political subdivisions, and time deposit accounts. The District's investments are in certificates of deposit as permitted by *Idaho Code* Section 67-1210.

Property Taxes. The District's property tax is levied by Lewis County in November and is payable by December 20th and June 20th immediately following the levy date. Taxes are collected by the County and are remitted to the District in the month following collection. Taxes are transferred to delinquent status on the day following the due date. A tax deed is issued on property three years from the initial date of delinquency.

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Deferred Outflows/Inflows of Resources. The District reports decreases in net assets that relate to future periods as deferred outflows of resources in a separate section of its government-wide statement of net position. Deferred outflows of resources reported in this year's financial statements include (1) a deferred outflow of resources for contributions made to the District's defined benefit pension plan between the measurement date of the net pension liabilities from that plan and the end of the District's fiscal year, and (2) deferred outflows of resources related to the differences between the expected and actual demographics for the District's multi-employer defined benefit fund. The deferred refunding amount is being amortized over the remaining life of the refunding bonds as part of interest expense. Deferred outflows for pension contributions will be recognized in the subsequent fiscal year. The deferred amount related to the actuarial assumptions for demographic factors in the pension fund will be recognized over a closed period equal to the average of the expected remaining service lives of all employees participating in the Plan. No deferred outflows of resources affect the governmental funds financial statements in the current year.

The District's statement of net position and its governmental fund balance sheet report a separate section for deferred inflows of resources. This separate financial statement element reflects an increase in net assets that applies to a future period(s). Deferred inflows of resources are reported in the District's various statements of net position for actual pension plan investment earnings in excess of the expected amounts included in determining pension expense. This deferred inflow of resources is attributed to pension expense over a total of 5 years, including the current year. In its governmental funds, the only deferred inflow of resources is for revenues that are not considered available. The District will not recognize the related revenues until they are available (collected not later than 60 days after the end of the District's fiscal year) under the modified accrual basis of accounting. Accordingly, unavailable revenues from property taxes and grants are reported in the governmental fund balance sheet.

Capital Assets. Capital assets are long-lived assets of the District as a whole. When purchased, such assets are recorded as expenditures in the governmental fund and capitalized. The District records all capital assets at their original cost. Assets acquired prior to 2003 are recorded at their estimated original cost. Interest is capitalized on capital assets during the construction period. Also, included in capital assets is infrastructure assets (e.g. streets, bridges, sidewalks, and similar items) constructed, acquired, or completed on or after October 1, 2003.

The District capitalizes equipment with an original unit cost of $3,000 or more and an expected life of more than 3 years. Equipment with an original unit cost of between $100 and $2,999 is not capitalized for depreciation purposes, but is recorded for inventory tracking purposes only. The District capitalizes capital improvements, including infrastructure, with an original cost of $10,000 or more and an expected life of more than 10 years.

Depreciation of capital assets is computed and recorded by the straight-line method. Estimated useful lives of the various classes of depreciable capital assets are as follows: buildings - 30 years; vehicles - 7 years; road equipment - 10 years; equipment and furniture - 7 years; computer equipment - 3 years; infrastructure - 7 to 30 years.

Compensated Absences. The District reimburses employees for unused vacation time but not sick leave upon termination of service.

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Pensions. For purposes of measuring the net pension liability and pension expense, information about the fiduciary net position of the Public Employee Retirement System of Idaho (PERSI) and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by PERSI. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

2. LEGAL COMPLIANCE – BUDGETS

The District follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. At least 10 days prior to the public hearing, the District publishes a proposed budget for public review.

2. A public hearing is set to obtain patrons' comments.

3. The final budget is adopted by the Board of Commissioners no later than the Tuesday following the first Monday in September for the following fiscal year.

The budget is a non-appropriated plan of spending, adopted on the modified cash basis of accounting. Expenditures may not exceed the budget at the individual fund level.

3. DEPOSITS AND INVESTMENTS

Deposits. At September 30, 2024, the carrying amount of the District's deposits (checking and savings accounts) was $1,217,841 and $951,597 is considered uninsured by the FDIC or NCUA.

Interest Rate Risk. According to the District's investment policy, investments are matched with anticipated cash flow requirements to the extent possible. Unless matched to a specific cash flow, the District does not directly purchase investments with maturities exceeding five years.

Custodial Risk. Custodial risk is the risk that, in the event of the failure of the investment custodian, the District will not be able to recover the value of its investments or collateral securities that are in the possession of the custodian. The District does not have a policy regarding custodial risk.

Credit Risk. As required by State law, all investments of the District's funds are obligations of the U.S. Government, U.S. agency issues, or certificate of deposit with State banks. The District has no investment policy that would further limit its investment choices.

4. CAPITAL ASSETS

A summary of changes in capital assets at September 30, 2024, is as follows:

	Beginning Balance	Additions	Deletions	Ending Balance
Capitalized listing				
Nondepreciable assets				
Land	$ 28,797			$ 28,797
Depreciable assets				
Auto and Truck	307,217			307,217
Buildings & Improvement	95,188			95,188
Equipment	542,183	$ 244,962		787,145
Infastructure	2,891,476			2,891,476
Miscellaneous	10,991			10,991
Office Equipment	1,975			1,975
	$ 3,877,827	$ 244,962	$ 0	4,122,789
Depreciable assets				
Accumulated depreciation				
Auto and Truck	$ 134,424	$ 17,255		151,679
Buildings & Improvement	60,761	2,211		62,972
Equipment	191,550	76,159		267,709
Infastructure	2,153,207	40,677		2,193,884
Miscellaneous	10,991			10,991
Office Equipment	1,975			1,975
	$ 2,552,908	$ 136,302	$ 0	2,689,210
Capital assets, net				$ 1,433,579

The entire amount of current year depreciation was unallocated.

5. DEFINED BENEFIT PENSION PLAN

The District contributes to the Base Plan, which is a cost sharing, multiple-employer defined benefit pension plan administered by the Public Employee Retirement System of Idaho (PERSI or System) that covers substantially all employees of the State of Idaho, its agencies, and various participating political subdivisions. The cost to administer the Plan is financed through the contributions and investment earnings of the Plan.

PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at www.persi.idaho.gov.

6. DEFINED BENEFIT PENSION PLAN (CONTINUED)

Responsibility for administration of the Base Plan is assigned to the Board comprised of five members appointed by the Governor and confirmed by the Idaho Senate. State law requires that two members of the Board be active Base Plan members with at least ten years of service and three members who are Idaho citizens not members of the Base Plan except by reason of having served on the Board.

Pension Benefits. The Base Plan provides for retirement, disability, death, and survivor benefits of eligible members or beneficiaries. Benefits are based upon members' years of service, age, and highest average salary. Members become fully vested in their retirement benefits with 5 years of credited service (5 months for elected or appointed officials). Members are eligible for retirement benefits upon attainment of the ages specified for their employment classifications. The annual service retirement allowance for each month of credited service is 2.0 percent of the average monthly salary for the highest consecutive 42 months.

The benefit payments for the Base Plan are calculated using a benefit formula adopted by the Idaho Legislature. The Base Plan is required to provide a 1 percent minimum cost of living increase per year provided the *Consumer Price Index* increases 1 percent or more. The PERSI Board has the authority to provide higher cost of living increases to a maximum of the *Consumer Price Index* movement or 6 percent, whichever is less; however, any amount above the 1 percent minimum is subject to review by the Idaho Legislature.

Member and Employer Contributions. Member and employer contributions paid to the Base Plan are set by statute and are established as a percent of covered compensation. Contribution rates are determined by the PERSI Board within limitations, as defined by state law. The Board may make periodic changes to employer and employee contribution rates (expressed as percentages of annual covered payroll) that are adequate to accumulate sufficient assets to pay benefits when due.

The contribution rates for employees are set by statute at 60 percent of the employer rate for general employees. At June 30, 2024, it was 6.71 percent for general employees. The employer contribution rate as a percent of covered payroll is set by the Retirement Board and was 11.18 percent for general employees.

Pension Liabilities, Pension Expense (Revenue), and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions. At September 30, 2024, the District reported a liability of $78,248 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2024, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The District's proportion of the net pension liability was based on the District's share of contributions in the Base Plan pension plan relative to the total contributions of all participating PERSI employers. At June 30, 2024, the District's proportion was .0020918 percent.

6. DEFINED BENEFIT PENSION PLAN (CONTINUED)

Pension Liabilities, Pension Expense (Revenue), and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions (Continued). For the year ended September 30, 2024, the District recognized a net (gain) loss on pension expense of $23,079. At September 30, 2024, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Employer contributions made subsequent to the measurement date	$ 3,000	
Differences between expected and actual experience	$ 12,458	
Changes in the employer's proportion and differences between the employer's contributions and the employer's proportionate contributions	$ 235	$ 4,943
Changes in assumptions or other inputs	$ 3,100	
Net difference between projected and actual earnings on pension plan investments		$ 1,420

Contributions made subsequent to the measurement date in the above table, will be recognized as a decrease of the net pension liability in the subsequent fiscal year.

The average of the expected remaining service lives of all employees that are provided with pensions through PERSI (active and inactive employees) determined at July 1, 2023, the beginning of the measurement period ended June 30, 2024, is 4.4.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (revenues) as follows

2025	$ 1,706
2026	13,643
2027	(3,530)
2028	(2,389)

Actuarial Assumptions. Valuations are based upon actuarial assumptions, benefit formulas, and employee groups. Level percentages of payroll normal costs are determined using the Entry Age Normal Cost Method. Under the Entry Age Normal Cost Method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated as a level percentage of each year's earnings of the individual between entry age and assumed exit age. PERSI amortizes any unfunded actuarial accrued liability based on a level percentage of payroll. The maximum amortization period permitted under Section 59-1322 of the *Idaho Code* is 25 years.

6. DEFINED BENEFIT PENSION PLAN (CONTINUED)

Actuarial Assumptions (Continued). The total pension liability in the June 30, 2024, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.30%
Salary increases including inflation	3.05%
Investment rate of return	6.35%, net of pension plan investment expense
Cost of Living Adjustments (COLA)	1.00%

Several different sets of mortality rates are used in the valuation for contributing members, service retirement members, and beneficiaries. These rates were adopted for the valuation dated July 1, 2024.

Contributing Members, Service Retirement Members, and Beneficiaries.

General Employees and All Beneficiaries – Male	Pub-2010 General Tables, increased 11%
General Employees and All Beneficiaries – Female	Pub-2010 General Tables, increased 21%
Teachers – Male	Pub-2010 Teacher Tables, increased 12%
Teachers – Female	Pub-2010 Teacher Tables, increased 21%
Fire and Police – Male	Pub-2010 Safety Tables, increased 21%
Fire and Police – Female	Pub-2010 Safety Tables, increased 26%
Disabled Members – Male	Pub-2010 Disabled Tables, increased 38%
Disabled Members – Female	Pub-2010 Disabled Tables, increased 36%

An experience study was performed for the period July 1, 2015 through June 30, 2020, which reviewed all economic and demographic assumptions other than mortality. The total pension liability as of June 30, 2024, is based on the results of an actuarial valuation date of July 1, 2024.

The long-term expected rate of return on pension plan investments was determined using the building block approach and a forward-looking model in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Even though history provides a valuable perspective for setting the investment return assumption, the System relies primarily on an approach, which builds upon the latest capital market assumptions. Specifically, the System uses consultants, investment managers, and trustees to develop capital market assumptions in analyzing the System's asset allocation. The assumptions and the System's formal policy for asset allocation are shown below. The formal asset allocation policy is somewhat more conservative than the current allocation of the System's assets.

The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation.

6. DEFINED BENEFIT PENSION PLAN (CONTINUED)

CAPITAL MARKET ASSUMPTIONS

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return (Arithmetic)
Cash	0%	0.00%
Large Cap	18%	4.50%
Small/Mid Cap	11%	4.70%
International Equity	15%	4.50%
Emerging Markets Equity	10%	4.90%
Domestic Fixed	20%	(0.25%)
TIPS	10%	(0.30%)
Real Estate	8%	3.75%
Private Equity	8%	6.00%

Discount Rate. The discount rate used to measure the total pension liability was 6.35 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate. Based on these assumptions, the pension plan's net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term expected rate of return was determined net of pension plan investment expense but without reduction for pension plan administrative expense.

Sensitivity of the District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate. The following presents the District's proportionate share of the net pension liability calculated using the discount rate of 6.35 percent, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.35 percent) or 1-percentage-point higher (7.35 percent) than the current rate:

	1 % Decrease (5.35%)	Current Discount Rate (6.35%)	1% Increase (7.35%)
District's proportionate share of the net pension liability	$ 148,696	$ 78,248	$ 20,710

Pension Plan Fiduciary Net Position. Detailed information about the pension plan's fiduciary net position is available in the separately issued PERSI financial report. PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at www.persi.idaho.gov.

7. RISK MANAGEMENT

The District is a member of the Idaho Counties Risk Management Program (ICRMP). ICRMP is an all-lines aggregate insurance program providing liability, property, and casualty insurance coverage to Idaho's counties and other political subdivisions on a voluntary participation basis. ICRMP assumes or reinsures all risk for covered claims. Participants are charged an annual insurance premium with no additional assessments for losses.

The general insurance limits are as follows:

General liability	$2,000,000 per claim
Property damage	Total insured value for amounts listed on application
Automobile liability	$2,000,000 per claim
Errors and omissions liability	$2,000,000 per claim
Crime insurance and bonding	$500,000 per claim
Boiler and machinery	$1,000,000 per claim
Chemical spraying liability	$500,000 per claim

8. SUBSEQUENT EVENTS

Management has evaluated subsequent events through January 30, 2025, the date the financial statements were available to be issued.

SUPPLEMENTARY INFORMATION

INDEPENDENT AUDITOR'S REPORT - *GOVERNMENT AUDITING STANDARDS*

Board of Commissioners
Kamiah Highway District
Kamiah, Idaho

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities and the major fund of the Kamiah Highway District, as of and for the year ended September 30, 2024, and the related notes to the financial statements, which collectively comprise the Kamiah Highway District's basic financial statements, and have issued our report thereon dated January 30, 2025.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Kamiah Highway District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements but not for the purpose of expressing an opinion on the effectiveness of the Kamiah Highway District's internal control. Accordingly, we do not express an opinion on the effectiveness of the Kamiah Highway District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We identified a certain deficiency in internal control over financial reporting, described in the accompanying schedule of findings and responses, item #2024-001 that we consider to be a significant deficiency.

Lewiston Office: 1216 Idaho Street, Lewiston, Idaho 83501, (208) 746-8281
Moscow Office: 609 South Washington, Suite 202, Moscow, Idaho 83843, (208) 882-2211
Grangeville Office: 109 South Mill Street, Grangeville, Idaho 83530, (208) 983-1254
Orofino Office: P.O. Box 632, 216 Johnson Avenue, Orofino, Idaho 83544, (208) 476-3012
Pullman Office: 1230 SE Bishop Blvd., Pullman, Washington 99163, (509) 332-6541
Eagle Office: 1159 E Iron Eagle Drive, Suite 100, Eagle, Idaho 83616, (208) 319-2929

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Kamiah Highway District's financial statements are free of material misstatement, we performed tests of compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of the financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and responses, item #2024-002.

Kamiah Highway District's Response to Findings

Government Auditing Standards require the auditor to perform limited procedures on the District's response to the findings identified in our audit and described in the accompanying schedule of findings and responses. The District's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on the response.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Presnell Gage, PLLC

January 30, 2025
Lewiston, Idaho

Person Responsible for Corrective Action Plan:

Dean Roach, Chairperson
Kamiah Highway District
Kamiah, ID 83536

SIGNIFICANT DEFICIENCY

Finding #2024-001

Criteria: Internal control systems generally attempt to divide up accounting tasks among multiple individuals (segregation of duties) to improve the ability of the organization to identify errors within the accounting system.

Condition: The District has concentrated many accounting duties to one individual such that the desired segregation of duties is not possible.

Effect: Many accounting duties are performed by a single individual with limited oversight available within the Board of Commissioners.

Response: The District's management and Board of Commissioners believe that the cost of hiring additional accounting staff outweighs the benefits that segregation of duties would provide.

Recommendation: We concur with the District's response.

REPORTABLE NONCOMPLIANCE

Finding #2024-002

Criteria: Idaho Statutes require the District to follow certain procedures when procuring services or personal property above $150,000 such as an open competitive sealed bid process with publishing the notice of the sealed bid opportunity in the District's local newspaper.

Condition: The District contacted vendors for quotes but did not have a sealed bid process or publish the process in the District's local newspaper.

Effect: The District did not follow Idaho Statues and it is possible the District didn't receive the lowest price for the property acquired.

Response: The District cannot alter or change the transaction. The District will review Idaho Statutes before procuring services or personal property.

Recommendation: We concur with the District's response.
