RE: Registry Information, 42-3202

To: State of Idaho Controller's Office

Attention: Rachel Rudishauser

Thanks for your assistance with the FY2023 registration for the Williams Creek 75-B Ditch. I appreciate your understanding in an unusual year.

As mentioned in my submission, our ditch secretary, Roger Rife, passed away unexpectedly last Fall. I do not have access to his notes from last year, though I am certain that our ditch information has been up to date previously. I am a fairly newly elected president of the ditch company with lots of experience irrigating and very limited experience reporting!

With the thoughtful assistance of your office, we were able to work our way through the annual registration—thank you again. However, there was a question posed from you as to why I used $0 figure in the 2023 budget. My explanation is as follows:

While there is approximately $1500 in the ditch entity's banking account, there were no fees collected in 2023, and no purchases were made in 2023 either. With no income and no expenditures, I deemed the 2023 budget to be $0. I have since met with the ditch watermaster, Kevin Rice, and he has concurred with me on these figures (nothing in or out of the account financially in 2023).

I am aware that there will need to be some excavation work completed on a section of the ditch in 2024, and will be sure to keep record of these expenses for future reporting purposes.

Please feel free to reach out to me personally at (208)756-7040 for anything further. Thank you for your time and help.

Jason Beyeler, Williams Creek 75-B Ditch President
